

**QILU SPECIAL STEEL CO.,LTD.**

## About Us

Qilu special steel Co, Ltd, which owns self import & export right, is a national large-scale professional manufacturer specialized in high alloy steel forging material and forging piece. Established in 1986 and located in Yanzhou Economic Development Zone, it is one of the main bases of excellent high alloy steel forging material and forging piece in China. The company has complete production processing and quality assurance system of refining , casting , forging , finish machining and physical chemical testing and has passed the international system certification of quality , environment and safety management and several certifications approved by the Classification Society of China , South Korea , Germany , etc . The main steel-making equipment include : two sets of 50t ultra-high power electric arc furnaces , two sets of 60t LF refining furnaces, one set of 60t vacuum degassing refining furnace and four sets of 1-20t electroslag re-melting furnaces ; the main forging equipments include : three sets of 5t electro-hydraulic hammers , one set of high-speed forging units of 800t , 1600t , 2000t and 4500t respectively ; the testing equipments mainly include : large-scale digital direct reading spectrometer ,

defect detector , nitrogen hydrogen and oxygen analyzer , universal testing machine , -60°C low-temperature impact testing machine , Zeiss microscope , etc. which are more than one hundred sets in total and introduced from China and foreign countries . The equipments reach the world advanced level and the company has powerful ability in production , testing , research and development of new product .The company mainly manufactures 300 kinds of high alloy steel forging products in 13 series , such as alloy structural steel , alloy tool steel , carbon structural steel ,carbon tool steel , bearing steel , stainless steel, and the like . Additionally, the company also has the capacity to forge round steel, steel flat, square steel, module, shaft and roller, etc. All the products are keystone products supported by the government, first-choice updating and upgrading forging materials and pieces for national key industries of automobile, locomotive, machinery, electric power and petroleum, coal and new forging material and piece varieties required by national defense construction, defense production and national key construction. Relying on most complete and most specialized special steel products , the company owns industrial advantages on favorable quality , complete variety , many specs and short production period . The main specifications of the products include :  $\Phi$  80-1000mm forging materials

and 80-1200mm square billets which the maximum piece weight can reach 50t. Having set up about 30 sales subsidiary companies in Beijing , Shanghai , Shenyang , Dalian , Luoyang , Shijiazhuang , Changsha , Wuhan , Tianjin , Guangdong , Harbin , Ningbo , Wuhu , Changzhou , etc. The company has established its sales network system which integrates point and sphere and radiates across the country. The products have been exported to more than 30 countries and regions including America, Germany, Italy, France, south Korea, Spain, Vietnam, Taiwan, etc. the company is honored as the National Large-scale Enterprise , the High-tech Enterprise in Shandong Province , Machinery industry Top100 enterprise , the Best Credit Integrity Enterprise , AAA Credit Enterprise , Privately-run Enterprise with special Contribution in Ji'ning , Merit Enterprise in 30-year Reform and Opening-up and the Advanced Energy-saving Enterprise and it is the enterprise group which receives the major support and development in the Plan to Adjust and Reinvigorate the steel industry in Shandong Province and from Shandong province and Ji'ning Municipal Government.

The company mainly manufactures 300 kinds of high-alloy steel forging products in 13 series , such as alloy structural steel , alloy

tool steel , carbon tool steel , bearing steel stainless steel , and the like Additionally , the company also has the capacity to forge round steel , steel flat , square steel , module , shaft and roller , etc .
