COLD-ROLLED NON GRAIN ORIENTED SILICON STEEL COIL

Product Applications

Silicon steel is manufactured into various cores by welding or riveting after sheet punching. The silicon steel product of Scott Industries can be widely used in electrical equipment manufacture of medium & small industrial electric motors, compressors for household appliances, power transformers, welding machine transformers and current regulators. Scott Industries can also provide semi-organic and inorganic coatings for different applications.

Product Features:

- a. High dimension accuracy, high surface quality and high stacking coefficient.
- b. Insulation film on surface, sound insulation properties and processability.
- c. Low core loss and high magnetic flux density.

Size Available:

Thickness: 0.35mm 0.50mm and 0.65mm

Width: 1000mm or 1200mm

Coil Weight: 3-6 tons

Standard: GB/T2521-1996, JIS C2552-86 and EN10106.

Packing: Sea worthy in coil, ID: 508mm,

Contact: Simple Hom
