Malimous

International Trading Services

Who we are

MALIMOUS Ltd is a worldwide trading company whose main commercial activities are linked with sales, and export. Our main markets are South-East Asian countries, Latin America, Black Sea and Mediterranean Sea countries, Eastern and Central Europe.

We have proved ourselves to be reliable and professional business partner on the global agricultural and industrial market. This is evident in multiple feedback and recommendations of our clients.

At MALIMOUS, we are driven by a desire to grow - whether it is to improve the performance of crops that feed the world responsibly, grow our business, our market share or our earnings. Our commitment to growth and diversification, within a framework of financial discipline, will endure as the cornerstone of our long-term strategy.

Company

MALIMUS is an international trading company that specializes in the trading of bulk agricultural commodities and other industrial products. We are always eager to develop new trading partners, while continuing to maintain the valuable relationships we have already established in international trade markets.

We possess the global strength to both sell and purchase a wide variety of agricultural import and export products by having affiliated offices positioned throughout the world.

Our expert trading teams have many years of experience in resourcing products from a variety of international origins and finding the lowest prices. Many of our traders are native to the countries with which we maintain business relationships, allowing them to have a better knowledge of the client's specific country and needs.

We have also become experts in the logistics involved with land and ocean shipments and will arrange for the movement of the product so that you can focus on your own business. We offer both containerized and break bulk shipments in a range of packaging options. Delivering personal service through coordinated teamwork is the backbone of our sales commitment. Our sales and logistics teams are connected at every stage of the process as we coordinate the movement and international delivery of trade products from one side of the globe to the other.

Malimous
