

Brand Name	Generic Name	Description
Generic Viagra	Sildenafil Citrate	Sildenafil Citrate Tablets are used to treat Erectile Dysfunction (ED) in men and pulmonary arterial hypertension (PAH). Discovered and manufactured by the pharmaceutical company Pfizer under the brand name Viagra, this unanticipated turn of events obviously had an impact on the marketing side of their product.
Generic Cialis	Tadalafil Tab	TADALAFIL (Cialis) is used to treat erectile dysfunction (ED) in men. Tadalafil does not cure ED or increase a man's sexual desire. Tadalafil is only for men with ED and is not for women or children. Tadalafil should only be used under a healthcare provider's care. Generic tadalafil is not yet available.
Generic Levitra	Vardenafil Tab	Vardenafil for harder, longer lasting erections. One of the latest treatments for Erectile Dysfunction, Snovitra acts in the same way as Viagra by blocking an enzyme called PDE-5. Clinical studies show that Snovitra works faster and has fewer side effects than Viagra.
Kamagra Tablets	Sildenafil Citrate Tabs	Sildenafil Citrate is the generic name for Kamagra pronounced as sill-DEN-uh-fil citrate. The generic name represents the medications nonproprietary or chemical name, whereas, the brand name is the name a pharmaceutical give to a medication for marketing purposes.
Kamagra Soft Tabs	Sildenafil Citrate Soft Tabs	Kamagra is a significant oral medication for the treatment of Erectile Dysfunction (ED). The medicine was originally developed as a cardiovascular medicine designed to improve blood flow in the vessels of the heart. However, during initial studies the medication was found to have a profound side effect: individuals began to report a remarkable difference in their ability to achieve and maintain an erection.
Kamagra Jelly	Sildenafil Citrate Jelly	Kamagra increases blood flow to the penis, allowing more blood flow into the penis, like happened naturally, when a man is sexually stimulated. With more blood flowing in and less flowing out, the arteries in the penis enlarge, resulting in an erection.
Apcalis Jelly	Tadalafil Jelly	Apcalis Jelly is mainly used to get and sustain an erection in cases of erectile dysfunction or in case of impotency. Apcalis Jelly (Tadalafil Jelly) is used for treating erectile dysfunction. Apcalis oral jelly is the world's first Tadalafil jelly. Apcalis oral jelly easily dissolves in mouth because of its liquid form and starts acting quickly compared to regular tablets.

Female Viagra
Lovegra

Sildenafil Citrate

Lovegra® is scientifically formulated to provide intense sexual satisfaction for women seeking ultimate pleasure. Lovegra® works by increasing genital blood flow and vaginal compliance resulting in intensified pleasure during sexual activity. Lovegra®, the distinctive 'pink-pill' is available for single women and couples in convenient low-cost tablet form.

Retino Cream

Tretinoin

Retino-A Cream is a vitamin A derivative. How it exerts its beneficial effects against acne is not fully known. Tretinoin appears to increase skin-cell turnover and to reduce the tendency for skin cells to stick together. This reduces the formation of acne and allows quicker healing of acne that does develop.

Generic Propecia -
Finpecia

Finasteride

Finpecia is made in India. Even though it contains the exact same chemical as Propecia (1mg of finasteride), its cost is significantly less than that of Propecia. Cipla is allowed by Indian patent law to make drugs that are patented by other companies internationally as the law protects only the processes by which drugs are made, and not the drugs themselves.

Bimatoprost

Bimatoprost

Bimatoprost is medicine for eyes. It treats various eye problems and is very effective. Glaucoma is one of the eye diseases bimatoprost treats. This disease can happen to anyone but mainly is seen in older people. It causes high pressure on eyes and leads to severe pain due to pressure. Even it can impair your vision. **Bimatoprost** cures glaucoma by saving eyes by restoring vision and by reducing pressure on eyes, which is very harmful. Also, it lessens pain.

Acomplia

Rimonabant

Rimonabant is used in the treatment of obesity and related conditions.

Aciphex

Rabeprezole

Rabeprazole is used for treating heartburn or irritation of the esophagus caused by gastroesophageal reflux disease (GERD). It may be used for short-term treatment of ulcers of the small intestine.

Allegra

Fexofenadine

Fexofenadine is used for treating seasonal allergy symptoms such as sneezing, runny nose, itchy throat, or itchy, watery eyes. It is also used to treat hives and skin itching.

Amoxil

Amoxycillin

Amoxycillin is used for treating infections caused by certain bacteria. It is also used with other medicines to treat H. pylori infection and ulcers of the small intestines.

Ampicillin

Ampicillin

Ampicillin is used to treat many different types of infections caused by bacteria, such as ear infections, bladder infections, pneumonia, gonorrhea, and E. coli or salmonella infection.

Atenolol	Atenolol	Atenolol is used for decreasing death due to heart problems after a heart attack. It may also be used for other conditions as determined by your doctor.
Augmentin	Amoxicillin + Clavulanate acid	Augmentin is used in the treatment of lower respiratory, middle ear, sinus, skin, and urinary tract infections that are caused by certain specific bacteria.
Avandia	Rosiglitazone	Rosiglitazone is an oral diabetes medicine that helps control blood sugar levels. It is for people with type 2 (non-insulin-dependent) diabetes.
Bactrim	Trimethoprim / Sulfam	Bactrim, an antibacterial combination drug, is prescribed for the treatment of certain urinary tract infections, severe middle ear infections in children, long-lasting or frequently recurring bronchitis in adults.
Biaxin	Clarithromycin	Clarithromycin is used to treat many different types of bacterial infections affecting the skin and respiratory system. It is also used together with other medicines to treat stomach ulcers.
Calan	Verapamil	Verapamil is used for treating supraventricular tachycardia, a rhythm disturbance of the heart. It is also used for controlling heart rate response to other rhythm disturbances, specifically atrial fibrillation and atrial flutter.
Celexa	Citalopram	Citalopram is used for treating depression. It may also be used for other conditions as determined by your doctor.
Carvedilol	Carvedilol	Carvedilol is used for treating high blood pressure or certain types of heart failure. It may also be used after a heart attack to improve survival in certain patients.
Celebrex	Celecoxib	Celecoxib is used for treating rheumatoid arthritis, osteoarthritis, ankylosing spondylitis, juvenile arthritis, menstrual pain, or pain. It is used in familial adenomatous polyposis (FAP).
Cipro	Ciprofloxacin	Ciprofloxacin is used to treat different types of bacterial infections. It may also be used to prevent or slow anthrax after exposure.
Cozaar	Losartan Potassium	Cozaar is used for treating high blood pressure. It is also used to reduce the risk of stroke in certain patients with high blood pressure and for treating kidney disease in certain patients with type 2 diabetes.
