VISION

To become an environmentally friendly **Imports & Exports company** with focus on **Minerals & Metals Products**

MISSION

- Focus on core competency and sustainable growth for stevedoring
- Promote a performance-based corporate culture
- Contribute to national economic development
- Contribute to the improvement of community welfare and preservation of the environment

STRATEGY

1. Focus on the growth of Minerals & metals, Mining & Coal
2. Boost the competency and re-generation of human resources as well as promote a performance-based corporate culture
3. Promote a performance-based reward system
4. Support social development program

About Us

ZAIN IMPEX is a unique corporate entity, in that, its foundation and strength stems from a vast knowledge in the field of Iron Ore Fines and Commodities. Its base of contacts (in the context of a commodity equation) is well balanced from both ends of the spectrum.

Primarily, we are one of the most renowned Imports & Exports company at Hospet and Bangalore. We are performing suppliers of Minerals (Iron ore Fines & Lumps) ,Dolomite, Quartz ,Pig iron,Sponge iron and Metal (Ferrous/Non Ferrous) Used Rail HMS – 1 & HMS -2 Steam Coal Aluminum Strips and Coils Seamless Pipes etc. To facilitate and perform all by ourselves for a methodical working of our sale & purchase process, we have set up associated offices in JODAIKEONJHAR of ORISSA state to source material from best mines in Orissa and delivery the iron ore fines to exporters plot in various ports. This way, we support the growth and continued orders of Iron ore fines supply to various ports nearby in a very controlled manner.

At Zain Impex, We have established partnerships and/or corporate arrangements with a myriad of companies so as to be able to address the needs of clients who are interested in GENUINE & REAL procurement and/or clients who require REAL customers for their products.

We are the corporate conduit that holds allocation on behalf of its suppliers for Sugar, Petroleum product, Steam coal, precious metals, Ferrous/Non Ferrous Metal and link genuine producers and/or owners of these commodities with genuine customers who have the fiscal strength to meet their requirements.

Our main line of function includes supply of Minerals (Iron ore, Chrome Ore, Manganese Ore), Energy Products (Petroleum & Coal) & Metals (Precious Metals, Ferrous and Non-ferrous metal) to various corporate houses across the globe. Committed to compliance and implementation of good corporate governance principles, the company is always working to apply a transparent, accountable and measurable system of its resources and their management.

Subsidiaries & Association Companies

In line with the Company's vision to become a competitive Imports & Exports company, along with Minerals, Metals & Energy-based company and provide optimal values to its valued customers across the globe, the Company set up adequate number of subsidiaries and associated companies in various sectors to support the achievement of the Company's target as well as development of various derivative in other sectors of commodity.

To meaningfully support the activities and achieve the desired results, Company has its associated partner companies in China (Shenzhen), Taiwan, Indonesia, and Hong Kong.

Zain Impex. Has entered into a special Joint Venture Program and Partnership with Taiwan Based ZCI CORPORATION Ltd to expand its ongoing stevedoring

operations, export of Iron ore fines and import of steam coal, minerals & metal products/raw materials from outside India.

Products & Services

Product/commodity that we actively engage to sell and trade following commodities:

- Iron Ore Fines,
- Iron ore lumps (all grades),
- Pig iron,
- Sponge iron,
- Calibrated iron ore,
- Dolomite,
- Quartz
- Mill Scale
- HMS 1 & 2
- Used Rails -from
- Russia,
- Saudi Arabia,
- Europe,
- USA
- And African countries
- For buyers (listed companies) in India.
- [Steam Coal sourcing -from Indonesia.](#)

Iron ores are rocks and minerals from which metallic iron can be economically extracted. The ores are usually rich in iron oxides and vary in color from dark grey, bright yellow, deep purple, to rusty red. The iron itself is usually found in the form of magnetite (Fe_3O_4), hematite (Fe_2O_3), goethite, limonite or siderite. Hematite is also known as "natural ore". The name refers to the early years of mining, when certain hematite ores contained 66% iron and could be fed directly into iron making blast furnaces. Iron ore is the raw material used to make pig iron, which is one of the main raw materials to make steel. 98% of the mined iron ore is used to make steel.

Iron is the world's most commonly used metal. It is used primarily in structural engineering applications and in maritime purposes, automobiles, and general industrial applications (machinery). Iron-rich rocks are common worldwide, but ore-grade commercial mining operations are dominated by the countries listed below. The major constraint to economics for iron ore deposits is not necessarily the grade or size of the deposits, because it is not particularly hard to geologically prove enough tonnage of the rocks exist.

KARNATAKA STATE. INDIA

The main constraint is the position of the iron ore relative to market, the cost of rail infrastructure to get it to market and the energy cost required to do so. World production averages one billion metric tons of raw ore annually. The world's largest producer of iron

ore is the Brazilian mining corporation Vale, followed by Anglo-Australian companies BHP Billiton and Rio Tinto Group. A further Australian supplier, Fortescue Metals Group Ltd may eventually bring Australia's production to second in the world. In Australia iron ore is won from three main sources: pisolite "channel iron deposit" ore derived by mechanical erosion of primary banded-iron formations and accumulated in alluvial channels such as at Pannawonica, Western Australia; and the dominant metasomatically altered banded iron formation related ores such as at Newman, the Chichester Range, the Hamersley Range and Koolyanobbing, Western Australia. Other types of ore are coming to the fore recently, such as oxidized ferruginous hard caps, for instance laterite iron ore deposits near Lake Argyle in Western Australia.

The total recoverable reserves of iron ore in India are about 9,602 million tones of hematite and 3,408 million tones of magnetite. Madhya Pradesh, Karnataka, Bihar, Orissa, Goa, Maharashtra, Andhra Pradesh, Kerala, Rajasthan and Tamil Nadu are the principal Indian producers of iron ore. World consumption of iron ore grows 10% per annum on average with the main consumers being China, Japan, Korea, the United States and the European Union. China is currently the largest consumer of iron ore, which translates to be the world's largest steel producing country. China is followed by Japan and Korea, which consume a significant amount

of raw iron ore and metallurgical coal. In 2006, China produced 588 million tons of iron ore, with an annual growth of 38%.

We Supply Iron ore of various grades at VIZAG, PARADIP and Haldia port. We shall be starting our operations from Belikeri, Mangalore and Krishnapatnam once the Karnataka Govt. revokes export ban. Commodity: Iron Ore Fine 63.5% Fe Rejection 62.5% Fe

The Ferrous and non-ferrous metals, Iron ore, manganese ore, Coal industry hold a bright potential for the future. All these commodities demand is projected to increase in future years. This increased demand is in line with the growth of the industrial sector in Asia, particularly China and India. In Indonesia, demand for coal supply is also projected to increase in future years. In addition to the Government's project to build "The Coal Based Steam Power Plant Accelerated Development Program", coal demand from the industrial sector is also projected to increase, due to alternative energy sought to substitute oil. These factors have created opportunities as well as challenges for the coal industry in directing their long-term business strategy. By adopting business ethics, complying with good corporate governance and anticipating the impact of global economic downturn, it is possible to dream.

The road ahead is very strong positive growth considering the fact that the group has a strong presence in Vishakhapatnam, Hospet, Bangalore, Taiwan and Hong Kong for developing sectors of new emerging markets. Our major forte remains supplying Calibrated iron ore for domestic users. However, commodities trading are one of the main focus areas of M/s **ZAIN IMPEX**. With its management having a rich experience of over 5 years the group now handles various bulk commodities like **Iron Ore Fines**,
