Minerals Trader®

Iron ore size lump from Corumba - Brazil

This proposal is aimed at buyers end importers, also the direct representatives of the steel mills with documents showing the relationship with steel mills plants. From the port in the Brazilian city of Corumba are dispatched convoys intended for iron ore exports to Argentina and THROUGH ports in the city of Rosario - Argentina. I hereby offer to establish direct relationship with the plants or their representatives to buy genuine minerals, logistic coordinate the river and make the export to steel production plants. How to ensure a fluid supply is placed to coordinate barge type Mississippi river own logistics. Only the river is impediment service to extract and export minerals extracted from Brazilian and Bolivian mines. Companies account for steel mills in Argentina and Paraguay river poor service in conjunction with the agricultural industry.
