

Carbon Adsorption System Protects LPG Storage Sphere

LPG storage sphere is large volume LPG storage structure.

LPG Storage sphere are constructed according to

Standard Industrial norms. The LPG Sphere is

designed as per ASME, ASME Sec. VIII Div.1,

ASME Sec. VIII and BS 5500. The volume of LPG

storage sphere ranges from 500 M3 to 8500 M3.

Design pressure of LPG storage sphere is

17.16 Bar.

Conveniences and Inconveniences

- Stores large volume.
- Requires less space for storage.
- Construction requires more time.
- Chances of collapse.
- Fabrication cost is more.
- Spheres uses less material compared to other.
- Spheres cannot move once constructed.
